***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions that are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, Applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-5, 7, 10-11 and 14-16, drawn to a method of comprising causing a plant to maintain a level of BiP greater than the endogenous level in a plant by overexpressing BiP.

Group II, claims 1-4, 6, 10-11 and 14-15, drawn to a method comprising causing a plant to maintain a level of BiP greater than the endogenous level in a plant by overexpressing calreticulin.

Group III, claims 1-4, 8, 10-11 and 14-15, drawn to a method comprising causing a plant to maintain a level of BiP greater than the endogenous level in a plant by modifying a signal transduction pathway leading to BiP induction.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: They do not share a special technical feature.

The technical feature linking the groups is a method comprising causing a plant to maintain a level of BiP greater than the endogenous level. This technical feature is taught by Crofts et al (1998, Plant Cell 10:813-823, cited in the search report), who teach plants that overexpress BiP (paragraph spanning pg 816-817). Thus, claim 1, among others is not novel, and the technical feature linking Groups I-III is not special.

Art Unit: 1638

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that for the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

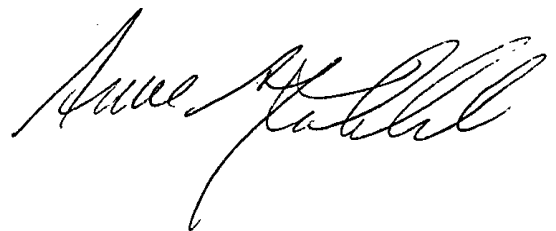

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
